

EASIFILL Vacuum Filling Machine

universal

FILLING MACHINE COMPANY

- Fast, accurate level filling
- Ideal for free flowing liquids into rigid containers – any size
- 316 stainless steel contact parts
- Simple operation & cleaning
- Virtually maintenance free – no moving parts
- Tool free speed & fill adjustment
- ATEX certified for hazardous areas
- Rapid product changeovers
- Available with 2, 4 or 6 heads

fulfilling your needs

Universal have been manufacturing vacuum filling machines since 1975 and the name EASIFILL has become synonymous with filling equipment for fine fragrance, spirits & a whole range of free flowing liquids. The EASIFILL machine became the benchmark, which other manufacturers have tried to emulate. Built using the highest quality materials & components the EASIFILL is the ultimate semi-automatic vacuum filling machine.

Vacuum filling is suitable for filling a wide range of free flowing liquids (perfumes, wines, spirits, oils & solvents) into rigid containers (glass, tin, ceramics & rigid plastics). The EASIFILL fills to a constant height from the neck of the bottle down regardless of volume of the bottle, making it particularly well suited to filling into glass where the tolerances & variation can be large.

General Machine Specifications:

- 316 stainless steel metal contact parts
- Stainless steel feed pipes with non-return valve suitable for drawing liquid from a tank at floor level
- Filling nozzles designed for optimum performance with fill height adjustment mechanism
- Height adjustable container support platform
- Adjustable vacuum control system to regulate fill speed
- Glass interceptor jar with quick release lid
- Quick release air connection
- Filling speeds up to 40 bottles per minute
- Accuracies of +/- 0.5mm can be achieved

Optional Equipment:

- 2, 4 or 6 head variants
- Portable stainless steel cabinet or bench mounted
- Pneumatic vacuum inducer or electrical vacuum pump
- Automatic overflow return unit
- Float level control feed tank 25 or 50 litre
- Hand held wander nozzle for filling very small containers
- Wide range of hose & seal materials to suit almost any liquid
